Step 1 - Understand the problem

Rephrase the problem

Cops are lazy and they need my help to make them work more efficiently. They need a script to help them cross-reference files containing phone numbers, only save those that occur in all of the files and then with the help of different file(containing phone numbers and names) find the owner of the phone num

Understanding the words

Pickle, haven't heard it before, not too surprising as it is Python exclusive name for serialization and before this course I never programmed in Python . A quick search on the web showed me that Pickle is a way to translate an object/data structure to a format that can be stored in a file and loaded into a different script.

Step 2 - Devising a plan
