Analysis report

Lab 1-1, The one with the travel company

Niklas Ling

Step 1 - Understand the problem

Rephrase the problem

A travel company needed help with creating a system for selling their tickets. They want it terminal based and wanted the input/output to work/look in a very specific way.

Understanding the words

There were no difficult words in the task description.

Step 2 - Devising a plan

The task at hand was quite straight forward a quick flowchart was made as shown to the right.

The plan is to store everything in a list called customer and create a menu system and validate the input with if statements and while loops and in the end format the output to the clients preference.
